WE'RE THINKING OF YOU

Thank you for purchasing an Electrolux appliance. You've chosen a product that brings with it decades of professional experience and innovation. Ingenious and stylish, it has been designed with you in mind. So whenever you use it, you can be safe in the knowledge that you'll get great results every time.

Welcome to Electrolux.

CUSTOMER CARE AND SERVICE

Always use original spare parts.

When contacting our Authorised Service Centre, ensure that you have the following data available: Model, PNC, Serial Number.

The information can be found on the rating plate.

 Warning / Caution-Safety information

 General information and tips

 Environmental information

Subject to change without notice.

1. SAFETY INFORMATION

Before the installation and use of the appliance, carefully read the supplied instructions. The manufacturer is not responsible for any injuries or damages that are the result of incorrect installation or usage. Always keep the

instructions in a safe and accessible location for future reference.

1.1 Children and vulnerable people safety

- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning the use of the appliance in a safe way and understand the hazards involved.
- Do not let children play with the appliance.
- Children shall not carry out cleaning and user maintenance of the appliance without supervision.
- Keep all packaging away from children and dispose of it appropriately.

1.2 General Safety

- This appliance is intended to be used in household and similar applications such as:
 - Farm houses; staff kitchen areas in shops, offices and other working environments
 - By clients in hotels, motels, bed and breakfast and other residential type environments
- Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.
- Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.
- Do not damage the refrigerant circuit.
- Do not use electrical appliances inside the food storage compartments of the appliance, unless they are of the type recommended by the manufacturer.
- Do not use water spray and steam to clean the appliance.
- Clean the appliance with a moist soft cloth. Only use neutral detergents. Do not use abrasive products, abrasive cleaning pads, solvents or metal objects.

- Do not store explosive substances such as aerosol cans with a flammable propellant in this appliance.
- If the supply cord is damaged, it must be replaced by the manufacturer, its Authorised Service Centre or similarly qualified persons in order to avoid a hazard.

2. SAFETY INSTRUCTIONS

2.1 Installation

WARNING!

Only a qualified person must install this appliance.

- Remove all the packaging and the transit bolts.
- Do not install or use a damaged appliance.
- Follow the installation instruction supplied with the appliance.
- Always take care when moving the appliance as it is heavy. Always use safety gloves and enclosed footwear.
- Make sure the air can circulate around the appliance.
- At first installation or after reversing the door wait at least 4 hours before connecting the appliance to the power supply. This is to allow the oil to flow back in the compressor.
- Before carrying out any operations on the appliance (e.g. reversing the door), remove the plug from the power socket.
- Do not install the appliance close to radiators or cookers, ovens or hobs.
- Do not install the appliance where there is direct sunlight.
- Do not install this appliance in areas that are too humid or too cold, such as the construction appendices, garages or wine cellars.
- When you move the appliance, lift it by the front edge to avoid scratching the floor.
- The appliance contains a bag of desiccant. This is not a toy. This is not food. Please dispose of it immediately.

2.2 Electrical connection

WARNING!

Risk of fire and electrical shock.

- The appliance must be earthed.
- Make sure that the parameters on the rating plate are compatible with the electrical ratings of the mains power supply.
- Always use a correctly installed shockproof socket.
- Do not use multi-plug adapters and extension cables.
- Make sure not to cause damage to the electrical components (e.g. mains plug, mains cable, compressor). Contact the Authorised Service Centre or an electrician to change the electrical components.
- The mains cable must stay below the level of the mains plug.
- Connect the mains plug to the mains socket only at the end of the installation. Make sure that there is access to the mains plug after the installation.
- Do not pull the mains cable to disconnect the appliance. Always pull the mains plug.

2.3 Use

WARNING!

Risk of injury, burns, electrical shock or fire.

- Do not change the specification of this appliance.
- Do not put electrical appliances (e.g. ice cream makers) in the appliance unless they are stated applicable by the manufacturer.

- Be careful not to cause damage to the refrigerant circuit. It contains isobutane (R600a), a natural gas with a high level of environmental compatibility. This gas is flammable.
- If damage occurs to the refrigerant circuit, make sure that there are no flames and sources of ignition in the room. Ventilate the room.
- Do not let hot items to touch the plastic parts of the appliance.
- Do not put soft drinks in the freezer compartment. This will create pressure on the drink container.
- Do not store flammable gas and liquid in the appliance.
- Do not put flammable products or items that are wet with flammable products in, near or on the appliance.
- Do not touch the compressor or the condenser. They are hot.
- Do not remove or touch items from the freezer compartment if your hands are wet or damp.
- Do not freeze again food that has been thawed.
- Obey the storage instructions on the packaging of frozen food.
- Before maintenance, deactivate the appliance and disconnect the mains plug from the mains socket.
- This appliance contains hydrocarbons in the cooling unit. Only a qualified person must do the maintenance and the recharging of the unit.
- Regularly examine the drain of the appliance and if necessary, clean it. If the drain is blocked, defrosted water collects in the bottom of the appliance.

2.6 Disposal

WARNING!

Risk of injury or suffocation.

- Disconnect the appliance from the mains supply.
- Cut off the mains cable and discard it.
- Remove the door to prevent children and pets to be closed inside of the appliance.
- The refrigerant circuit and the insulation materials of this appliance are ozone-friendly.
- The insulation foam contains flammable gas. Contact your municipal authority for information on how to discard the appliance correctly.
- Do not cause damage to the part of the cooling unit that is near the heat exchanger.

2.4 Internal light

- The type of lamp used for this appliance is not suitable for household room illumination

2.5 Care and cleaning

WARNING!

Risk of injury or damage to the appliance.

3. OPERATION

3.1 Control panel

1 Display

2 DrinksChill /

ON/OFF

- 3** Temperature colder button
- 4** Temperature warmer button
- 5** Fridge compartment button

It is possible to change predefined sound of buttons to a loud one by pressing together Mode and temperature colder

- 6** Freezer compartment button
- 7** Mode

buttons for a few seconds. Change is reversible.

3.2 Display

- A.** Fridge temperature indicator
- B.** Fridge OFF indicator
- C.** Holiday mode
- D.** Fridge Eco mode
- E.** Shopping mode
- F.** Alarm indicator
- G.** Freezer Eco mode
- H.** FastFreeze mode
- I.** Freezer temperature indicator / Timer
- J.** DrinksChill mode
- K.** FreeStore mode

- i** After selection of the fridge or freezer compartment the animation starts ----
After selection of the temperature the animation flashes for a few minutes.

3.3 Switching on

1. Connect the mains plug to the power socket.
2. Press the appliance ON/OFF if the display is off. The temperature indicators show the set default temperature.

- i** The alarm buzzer could operate after few seconds. To reset the alarm refer to "High temperature alarm".

To select a different set temperature refer to "Temperature regulation".

If "DEMO" appears on the display, refer to "Troubleshooting".

3.4 Switching off

Press ON/OFF for 3 seconds. The display switches off.

To disconnect the appliance from the power, disconnect the mains plug from the power socket.

3.5 Switching on the fridge

To switch on the fridge press the fridge compartment button. The fridge OFF indicator goes off.

- i** To select a different set temperature refer to "Temperature regulation".

3.6 Switching off the fridge

To switch off the fridge press the fridge compartment button for few seconds. The fridge OFF indicator is shown.

3.7 Temperature regulation

Set the temperature of the appliance by pressing the temperature regulators.

Default set temperature:

- +4°C for the fridge

- -18°C for the freezer

The temperature indicators show the set temperature.

-  The set temperature will be reached within 24 hours. After a power failure the set temperature remains stored.

3.8 Holiday mode

This function allows you to keep the refrigerator closed and empty during a long holiday period without the formation of a bad smell.

-  The fridge compartment must be empty with Holiday mode on.

1. To switch on the function press Mode until the corresponding icon appears. The Holiday indicator goes on. The fridge temperature indicator shows the set temperature.

2. To switch off the function press Mode in order to select an other function or press Mode until you can see none of the special icons.

The Holiday indicator goes off.

-  The function switches off by selecting a different fridge set temperature.

3.9 Shopping mode

If you need to insert a large amount of warm food, for example after doing the grocery shopping, we suggest activating the Shopping to chill the products more rapidly and to avoid warming the other food which is already in the refrigerator.

The Shopping shuts off automatically after approximately 6 hours.

1. To switch on the function press Mode until the corresponding icon appears. The Shopping indicator goes on.
2. To switch off the function press Mode in order to select an other function or press Mode until you can see none of the special icons.

The Shopping indicator goes off.

-  The function switches off by selecting a different fridge set temperature.

3.10 Eco mode

For optimal food storage select the Eco mode.

1. Select the fridge/freezer compartment
2. To switch on the function press Mode until the corresponding icon appears.

The temperature indicator shows the set temperature for the:

- fridge: +4°C
 - freezer: -18°C
3. To switch off the function before its automatic end repeat the procedure until the Eco indicator goes off.

-  The function switches off by selecting a different set temperature.

3.11 DrinksChill mode

The DrinksChill mode is to be used to set an acoustic alarm at the preferred time, useful for example when a recipe requires to cool down a mixture for a certain period of time, or when a reminder is needed in order not to forget the bottles placed in the freezer for fast cooling.

1. To switch on the function press ON/OFF.

The DrinksChill indicator appears.

The timer shows the set value (30 min).

2. Press the temperature colder button and temperature warmer button to change the timer set value from 1 to 90 (min).

The timer indicator is shown (min).

At the end of the countdown the DrinksChill indicator flashes and an audible alarm sounds

3. Remove any drinks contained in the freezer compartment.
4. Press ON/OFF to switch off the sound and terminate the function.

It is possible to deactivate the function at any time during the countdown by pressing ON/OFF. The DrinksChill indicator goes off.

It is possible to change the time during the countdown and at the end by pressing the temperature colder button and the temperature warmer button.

3.12 FastFreeze mode

This function stops automatically after 52 hours.

To switch on the function:

1. Select the freezer compartment.
2. Press Mode until the corresponding icon appears.

The FastFreeze indicator is shown.

3. To switch off the function before its automatic end, repeat the procedure

The function switches off by selecting a different freezer set temperature.

3.13 FreeStore mode

1. Press Mode until the corresponding icon appears.

The FreeStore indicator flashes.

2. Press Mode to select another function or nothing.

The activation of the FreeStore function increases energy consumption. If the function is activated automatically the FreeStore indicator is not shown (refer to "Daily use").

3.14 High temperature alarm

An increase in the temperature in the freezer compartment (for example due to an earlier power failure or opening of the door) is indicated by:

- flashing the alarm and freezer temperature indicators;
- sounding of buzzer.

To reset the alarm press any button.

The buzzer switches off.

The freezer temperature indicator shows the highest temperature reached for a few seconds. Then show again the set temperature.

The alarm indicator continues to flash until the normal conditions are restored.

When the alarm has returned the alarm indicator goes off.

3.15 Door open alarm

An acoustic alarm will sound if the door is left open for a few minutes. The door open alarm conditions are indicated by:

- flashing Alarm light
- acoustic buzzer

When normal conditions are restored (door closed), the alarm will stop.

During the alarm, the buzzer can be switched off by pressing alarm button.

4. DAILY USE

WARNING!
Refer to Safety chapters.

4.1 Cleaning the interior

Before using the appliance for the first time, the interior and all internal accessories should be washed with

lukewarm water and some neutral soap to remove the typical smell of a brand-new product, then dried thoroughly.

CAUTION!

Do not use detergents, abrasive powders, chlorine or oil-based cleaners as they will damage the finish.

4.2 Positioning the door shelves

To permit storage of food packages of various sizes, the door shelves can be placed at different heights.

1. Gradually pull the shelf in the direction of the arrows until it comes free.
2. Reposition as required.

This model is equipped with a variable storage box which can be moved sideways.

4.3 Movable shelves

The walls of the refrigerator are equipped with a series of runners so that the shelves can be positioned as desired.

Do not move the glass shelf above the vegetable drawer to ensure correct air circulation.

4.4 FreeStore

The refrigerator compartment is equipped with a device that allows rapid cooling of food and keeps a more uniform temperature in the compartment.

This device activates automatically when needed, for example for a quick temperature recovery after door opening or when the ambient temperature is high.

It is possible to switch on the device manually when needed (refer to "FreeStore mode").

The FreeStore device stops when the door is open and restarts immediately after the door closing.

4.5 Temperature indicator

For proper storage of food the refrigerator is equipped with the

temperature indicator. The symbol on the side wall of the appliance indicates the coldest area in the refrigerator.

If OK is displayed (A), put fresh food into area indicated by symbol, if not (B), adjust the temperature controller to a colder setting and wait 12 hours before checking the temperature indicator again.

After putting fresh food into the appliance or after opening the door repeatedly or for a long period, it is normal for the indicator not to show OK; wait at least 12 hours before readjusting the temperature controller.

4.6 Humidity control

The glass shelf incorporates a device with slits (adjustable by means of a sliding lever), which makes it possible to regulate the humidity in the vegetable drawer(s).

When the ventilation slots are closed:

the natural moisture content of the food in the fruit and vegetable compartments is preserved for longer.

When the ventilation slots are opened:

more air circulation results in a lower air moisture content in the fruit and vegetable compartments.

4.7 Freezing fresh food

The freezer compartment is suitable for freezing fresh food and storing frozen and deep-frozen food for a long time.

To freeze fresh food activate the FastFreeze function and place the food to be frozen in the freezer compartment.

To freeze fresh food activate the FastFreeze function at least 24 hours before placing the food to be frozen in the freezer compartment.

Place the fresh food to be frozen in the top compartment.

The maximum amount of food that can be frozen in 24 hours is specified on the **rating plate**, a label located on the inside of the appliance.

The freezing process lasts 24 hours: during this period do not add other food to be frozen.

When the freezing process is completed, return to the required temperature (see "FastFreeze Function").

In this condition, the refrigerator compartment temperature might drop below 0°C. If this occurs reset the temperature regulator to a warmer setting.

4.8 Storage of frozen food

When first starting-up or after a period out of use, before putting the products in the compartment let the appliance run at least 2 hours on the higher settings.

In the event of accidental defrosting, for example due to a power failure, if the power has been off for longer than the value shown in the technical characteristics chart under "rising time", the defrosted food must be consumed quickly or cooked immediately and then re-frozen (after cooling).

4.9 Thawing

Deep-frozen or frozen food, prior to being used, can be thawed in the refrigerator compartment or at room temperature, depending on the time available for this operation.

Small pieces may even be cooked still frozen, directly from the freezer: in this case, cooking will take longer.

5. HINTS AND TIPS

5.1 Normal operating sounds

The following sounds are normal during operation:

- A faint gurgling and bubbling sound from coils sound when refrigerant is pumped.
- A whirring and pulsating sound from the compressor when refrigerant is pumped.
- A sudden cracking noise from inside appliance caused by thermic dilatation (a natural and not dangerous physical phenomenon).
- A faint click noise from the temperature regulator when the compressor switches on or off.

5.2 Hints for energy saving

- Do not open the door frequently or leave it open longer than absolutely necessary.
- If the ambient temperature is high and the Temperature Regulator is set to low temperature and the appliance is fully loaded, the compressor may run continuously, causing frost or ice on

4.10 Ice-cube production

This appliance is equipped with one or more trays for the production of ice-cubes.

Do not use metallic instruments to remove the trays from the freezer.

1. Fill these trays with water
2. Put the ice trays in the freezer compartment.

4.11 Cold accumulators

The freezer contains at least one cold accumulator which increases storage time in the event of a power cut or breakdown.

This shall be placed on top of the frozen food in the front part.

the evaporator. If this happens, set the Temperature Regulator toward warmer settings to allow automatic defrosting and so a saving in electricity consumption.

- If foreseen, do not remove the cold accumulators from the freezer basket.

5.3 Hints for fresh food refrigeration

To obtain the best performance:

- do not store warm food or evaporating liquids in the refrigerator
- do cover or wrap the food, particularly if it has a strong flavour
- position food so that air can circulate freely around it

5.4 Hints for refrigeration

Useful hints:

- Meat (all types): wrap in a suitable packaging and place it on the glass shelf above the vegetable drawer. Store meat for at most 1-2 days.
- Cooked foods, cold dishes: cover and place on any shelf.

- Fruit and vegetables: clean thoroughly and place in a special drawer. Bananas, potatoes, onions and garlic must not be kept in the refrigerator if not packed.
- Butter and cheese: place in a special airtight container or wrap in an aluminium foil or a polythene bag to exclude as much air as possible.
- Bottles: close with a cap and place on the door bottle shelf, or (if available) on the bottle rack.

5.5 Hints for freezing

To help you make the most of the freezing process, here are some important hints:

- the maximum quantity of food which can be frozen in 24 hours is shown on the rating plate;
- the freezing process takes 24 hours no further food to be frozen should be added during this period;
- freeze only top quality, fresh and thoroughly cleaned, foodstuffs;
- prepare food in small portions to enable it to be rapidly and completely frozen and to make it possible subsequently to thaw only the quantity required;
- wrap up the food in aluminium foil or polythene and make sure that the packages are airtight;
- do not allow fresh, unfrozen food to touch food which is already frozen,

thus avoiding a rise in temperature of the latter;

- lean foods store better and longer than fatty ones; salt reduces the storage life of food;
- water ices, if consumed immediately after removal from the freezer compartment, can possibly cause the skin to be freeze burnt;
- it is advisable to show the freezing in date on each individual pack to enable you to keep tab of the storage time.

5.6 Hints for storage of frozen food

To obtain the best performance from this appliance, you should:

- make sure that the commercially frozen foodstuffs were adequately stored by the retailer;
- be sure that frozen foodstuffs are transferred from the foodstore to the freezer in the shortest possible time;
- not open the door frequently or leave it open longer than absolutely necessary;
- once defrosted, food deteriorates rapidly and cannot be refrozen;
- do not exceed the storage period indicated by the food manufacturer.

6. CARE AND CLEANING

WARNING!

Refer to Safety chapters.

6.1 General warnings

CAUTION!

Unplug the appliance before carrying out any maintenance operation.

This appliance contains hydrocarbons in its cooling unit; maintenance and recharging must therefore only be carried out by authorized technicians.

The accessories and parts of the appliance are not suitable for washing in a dishwasher.

6.2 Periodic cleaning

CAUTION!

Do not pull, move or damage any pipes and/or cables inside the cabinet.

CAUTION!

Take care of not to damage the cooling system.

CAUTION!

When moving the cabinet, lift it by the front edge to avoid scratching the floor.

The equipment has to be cleaned regularly:

1. Clean the inside and accessories with lukewarm water and some neutral soap.
2. Regularly check the door seals and wipe clean to ensure they are clean and free from debris.
3. Rinse and dry thoroughly.
4. If accessible, clean the condenser and the compressor at the back of the appliance with a brush.
This operation will improve the performance of the appliance and save electricity consumption.

6.3 Defrosting of the refrigerator

Frost is automatically eliminated from the evaporator of the refrigerator compartment every time the motor compressor stops, during normal use. The defrost water drains out through a trough into a special container at the back of the appliance, over the motor compressor, where it evaporates.

It is important to periodically clean the defrost water drain hole in the middle of

the refrigerator compartment channel to prevent the water overflowing and dripping onto the food inside.

6.4 Defrosting the freezer

The freezer compartment is frost free. This means that there is no build up of frost when it is in operation, neither on the internal walls nor on the foods.

6.5 Periods of non-operation

When the appliance is not in use for long periods, take the following precautions:

1. Disconnect the appliance from electricity supply.
2. Remove all food.
3. Clean the appliance and all accessories.
4. Leave the door/doors open to prevent unpleasant smells.

WARNING!

If you want to keep the appliance switched on, ask somebody to check it once in a while to prevent the food inside from spoiling in case of a power failure. We recommend activating Holiday mode.

7. TROUBLESHOOTING

WARNING!

Refer to Safety chapters.

7.1 What to do if...

Problem	Possible cause	Solution
The appliance does not operate.	The appliance is switched off.	Switch on the appliance.
	The mains plug is not connected to the mains socket correctly.	Connect the mains plug to the mains socket correctly.
	There is no voltage in the mains socket.	Connect a different electrical appliance to the mains socket. Contact a qualified electrician.
The appliance is noisy.	The appliance is not supported properly.	Check if the appliance stands stable.
Audible or visual alarm is on.	The cabinet has been recently switched on or the temperature is still too high.	Refer to "Door open alarm" or "High temperature alarm".
	The temperature in the appliance is too high.	Refer to "Door open alarm" or "High temperature alarm".
	The door is left open.	Close the door.
	The temperature in the appliance is too high.	Contact a qualified electrician or contact the nearest Authorised Service Centre.
A square symbol is shown instead of numbers on the Temperature Display.	Temperature sensor problem.	Contact the nearest Authorised Service Centre (the cooling system will continue to keep food products cold, but temperature adjustment will not be possible).
The lamp does not work.	The lamp is in stand-by.	Close and open the door.
The lamp does not work.	The lamp is defective.	Contact the nearest Authorised Service Centre.
The compressor operates continually.	Temperature is set incorrectly.	Refer to "Operation".
	Many food products were put in at the same time.	Wait some hours and then check the temperature again.
	The room temperature is too high.	Refer to climate class chart on the rating plate.
	Food products placed in the appliance were too warm.	Allow food products to cool to room temperature before storing.

Problem	Possible cause	Solution
	The door is not closed correctly.	Refer to "Closing the door".
	The FastFreeze is switched on.	Refer to "FastFreeze mode".
	The Shopping is switched on.	Refer to "Shopping mode".
There is too much frost and ice.	The door is not closed correctly or the gasket is deformed/dirty.	Refer to "Closing the door".
The compressor does not start immediately after pressing the FastFreeze, or after changing the temperature.	This is normal, no error has occurred.	The compressor starts after a period of time.
The compressor does not start immediately after pressing the Shopping, or after changing the temperature.	This is normal, no error has occurred.	The compressor starts after a period of time.
Water flows on the rear plate of the refrigerator.	During the automatic defrosting process, frost melts on the rear plate.	This is correct.
Water flows inside the refrigerator.	The water outlet is clogged.	Clean the water outlet.
	Food products prevent that water flows into the water collector.	Make sure that food products do not touch the rear plate.
Water flows on the floor.	The melting water outlet is not connected to the evaporative tray above the compressor.	Attach the melting water outlet to the evaporative tray.
Temperature cannot be set.	The FastFreeze or Shopping mode is switched on.	Switch off FastFreeze or Shopping manually, or wait until the function resets automatically to set the temperature. Refer to "FastFreeze or Shopping mode".
DEMO appears on the display.	The appliance is in demonstration mode.	Keep the Mode pressed for approximately 10 seconds until a long sound is heard and display shuts off for a short time.

Problem	Possible cause	Solution
The temperature in the appliance is too low/too high.	The temperature regulator is not set correctly.	Set a higher/lower temperature.
	The door is not closed correctly.	Refer to "Closing the door".
	The food products' temperature is too high.	Let the food products temperature decrease to room temperature before storage.
	Many food products are stored at the same time.	Store less food products at the same time.
	The door has been opened often.	Open the door only if necessary.
	The Shopping Fast-Freeze mode is switched on.	Refer to "Shopping Fast-Freeze mode".
	There is no cold air circulation in the appliance.	Make sure that there is cold air circulation in the appliance.

If the advice does not lead to the desired result, contact the nearest Authorised Service Centre.

7.2 Replacing the lamp

The appliance is equipped with a longlife LED interior light.

Only service is allowed to replace the lighting device. Contact your Authorised Service Centre.

7.3 Closing the door

1. Clean the door gaskets.
2. If necessary, adjust the door. Refer to assembly instructions.
3. If necessary, replace the defective door gaskets. Contact the Authorised Service Centre.

8. INSTALLATION

8.1 Location

Refer to the assembly instructions for the installation.

To ensure best performance, install the appliance well away from sources of heat such as radiators, boilers, direct sunlight etc. Make sure that air can circulate freely around the back of the cabinet.

8.2 Positioning

Install the appliance in a dry, well ventilated indoors where the ambient temperature corresponds to the climate class indicated on the rating plate of the appliance.

Climate class	Ambient temperature
SN	+10°C to + 32°C

Climate class	Ambient temperature
N	+16°C to + 32°C
ST	+16°C to + 38°C
T	+16°C to + 43°C

i Some functional problems might occur for some types of models when operating outside of that range. The correct operation can only be guaranteed within the specified temperature range. If you have any doubts regarding where to install the appliance, please turn to the vendor, to our customer service or to the nearest Authorised Service Centre.

8.3 Electrical connection

- Before plugging in, ensure that the voltage and frequency shown on the rating plate correspond to your domestic power supply.
- The appliance must be earthed. The power supply cable plug is provided with a contact for this purpose. If the domestic power supply socket is not

earthed, connect the appliance to a separate earth in compliance with current regulations, consulting a qualified electrician.

- The manufacturer declines all responsibility if the above safety precautions are not observed.
- This appliance complies with the E.E.C. Directives.

8.4 Ventilation requirements

The airflow behind the appliance must be sufficient.

CAUTION!
Refer to the assembly instructions for the installation.

9. NOISES

There are some sounds during normal running (compressor, refrigerant circulation).

10. TECHNICAL DATA

10.1 Technical data

According to 1/1998. (I. 12.) IKIM
ministerial decree

Producer	Electrolux
----------	------------

Product category	Refrigerator - Freezer	
Dimensions of the recess		
Height	mm	1780
Width	mm	560
Depth	mm	550
Fridge net capacity	Litre	200
Freezer net capacity	Litre	63
Energy class (from A++ to G, where A++ is the most efficient, G is the least efficient)		A+
Energy consumption (depending on the usage and the placement)	kWh/y	297
Star rating		****
Rising time	Hours	21
Freezing capacity	Kg/24h	10
Climatic class		SN-N-ST-T
Voltage	Volts	230-240
Frequency	Hz	50
Noise level	dB/A	39
Built-in		yes

The technical information is situated in the rating plate, on the external or

internal side of the appliance and in the energy label.

11. ENVIRONMENTAL CONCERNS

Recycle the materials with the symbol . Put the packaging in applicable containers to recycle it. Help protect the environment and human health and to recycle waste of electrical and electronic appliances. Do not dispose appliances

marked with the symbol  with the household waste. Return the product to your local recycling facility or contact your municipal office.
